shearing parts in the
collection were used

Martin Wizard Sheep Shearing Machine

THE MARTIN WIZARD SHEEP SHEARING MACHINE PAYS FOR ITSELF \$18⁷⁵
IN NETS YOU A PROFIT OF SEVERAL TIMES THE COST OF THE MACHINE
IN THE FIRST SEASON, IN COST OF LABOR AND VALUE OF EXTRA WOOL
PRODUCED. DON'T WASTE TIME AND MONEY IN CLIPPING YOUR SHEEP BY HAND

AS EXPLAINED ON THE OPPOSITE PAGE. Observe our figures showing that you can save \$72.50 the first season on a flock of 200 sheep, as against the hand shears method, saving almost four times the cost of the machine. Even with 100 sheep it will pay for itself about twice over; thus not only costing you nothing but netting you a substantial profit.

THE MARTIN WIZARD IS IN A CLASS BY ITSELF. No other machine on the market can compare with it in the amount of work it will do and the speed with which it will perform its work under all conditions. With it you can shear the heaviest woolled Spanish Merino with ease, without clog, no matter how greasy the wool or how fast you shear. It cuts faster than you can handle the sheep and never needs to be forced through the wool. It shears the rest of the sheep, leaving no part to be finished with the hand shears, from the heaviest matted wool on the brisket to the fine wool around the head. It makes an absolutely complete and perfect job. We have the utmost confidence in the Martin Wizard and predict that every wide awake sheep man in the United States will be using the Wizard Machine inside of five years. We will be more than pleased to ship this machine on our free trial plan as explained on the opposite page.

THE QUALITY AND CONSTRUCTION OF THE MARTIN WIZARD. Nothing but the very best qualities of material and the finest expert labor enter into the Martin Wizard construction. We know the American farmer insists on getting the best, because it pays in the long run; we know that on the successful operation and the lasting qualities of our machine depends our entire sheep shearing machine business, and we have spared no expense to insure that only the best material and most perfect workmanship are put into it. The large balance wheel is made from specially toughened iron carefully turned in the lathe to secure accuracy and free running. It is mounted on Bessemer steel roller bearings of our own design which are guaranteed to run easier and wear longer than any ball bearing or any other roller bearing in the world. The bearings and shaftings are machined true to 1-1000 part of an inch. All shafting is specially cold rolled steel carefully case hardened by the cyanide process, insuring long life and easy running. The frame is the best wrought tubing. The shaft and casing the finest cold drawn steel tubing. All gears are cut from a solid bar of steel and each tooth milled separately and accurately. The cutter levers or the part carrying the upper knives is manganese bronze, with a tensile strength of 65,000 pounds to the inch. This material costs ten times as much as steel, only being used up to the present time on exclusively high priced machinery such as automobiles, etc. No other sheep shearing machine on the market contains it. The comb and cutter, the most important parts of a shearing machine are the best imported Swedish razor steel, far superior to any other knives on the market, specially tempered by our own process and ground absolutely perfect to 1-5000 part of an inch. Many of our customers write and tell us they shear as high as 80 to 100 head without changing knives. 40 head is, however, a fair average.

THE MARTIN WIZARD is the only machine based on absolutely correct principles. The cutting device is patterned after the ordinary pair of scissors, for no better cutting device than scissors was ever invented. The Martin Wizard cutting device cuts the wool fiber with a pair of scissors-like motion, just as your hand shears do it, only that it cuts with a marvelous speed, there being 1,600 strokes to the minute. Furthermore, the comb has sixteen perfect cutting edges, each one corresponding to one side of your hand shears, making eight perfect pairs of shears. The upper cutter consists of two prongs so gauged as to fit perfectly between the cutting edges of the comb. Mark this! It is between and not on top of. Every time they travel across the comb, they drop in between the cutting edges and are brought against the cutting edge of each of the cutting edges with a drawing scissors-like motion which cuts the fiber. Thus, you have in effect eight pairs of hand shears, cutting each of the 1,600 times the cutters cross the comb, making 12,800 perfect, clean, scissors-like cuts a minute. So you see how it is impossible to clog the Wizard. Besides, as the knives are guarded, it is impossible either to cut yourself or to injure the sheep. Every experienced sheep shearer who has used hand shears knows how frequently sheep are injured in cutting with the hand shears. The Wizard way is the humane way to shear sheep.

THE WIZARD IS THE EASIEST RUNNING SHEEP SHEARING MACHINE ever invented and absolutely noiseless. It saves its cost almost the first day in the saving in cost of labor alone. Two men can easily shear 150 head a day. At \$2.25 a day this makes your shearing cost but 3 cents a head; hand shears shearing costs 12 to 15 cents a head, and adding the extra wool you get in using the Martin Wizard, it runs your saving up to over the cost of the machine and makes you a clear net profit. You certainly cannot afford to be without the Martin Wizard or afford to invest in any other type of machine.

FACTORY OR MONEY REFUNDED.

Exactly what it says! We absolutely guarantee the Martin Wizard will do everything that a sheep shearing machine can do. We guarantee perfect results in material and workmanship. We guarantee that you will find it a satisfactory, profitable investment, and if you do not find it to be all of these things we want you to return it and get your money back as well as all transportation charges you may incur.

OK4850 Martin Wizard Driving Power with Martin Standard Head. Price, \$15.75
OK4863 Comb Guard Attachment for the Wizard Head, enabling the shearer to run 1/4 to 1/2 of an inch of wool on the sheep's back to protect it from the sun. Price, 1.00

MARTIN STANDARD SHEEP SHEARING MACHINE, \$12⁷⁵

THE SINGLE EXCEPTION OF THE MARTIN WIZARD (ABOVE ILLUSTRATED AND DESCRIBED) THE MARTIN STANDARD IS ABSOLUTELY THE HIGHEST GRADE, STRONGEST, SIMPLEST, EASIEST RUNNING, CLOSEST CUTTING AND MOST PERFECT WORKING MACHINE EVER PRODUCED

YOU CAN GET THE MARTIN STANDARD ABSOLUTELY FREE, simply because it pays for itself several times over on the first day's work it does for you. It will pay for itself in the extra wool you get off the first 50 sheep you shear and there is a saving of labor to consider as well, because any inexperienced man can shear anywhere from 75 to 150 sheep per day. Think of it! What a wonderful saving this is against the hand shearing method, and certainly no other sheep shearing machine (except the Martin Wizard) can compare with it for effective and rapid work. Don't leave the best part of the fleece on the sheep's back. Get a record breaking crop this year by using one of our machines. Figure this for yourself; the first 50 sheep you shear will pay for the machine and leave you a handsome profit. You will get 75 to 100 pounds more wool off the first 50 sheep. At 25 cents per pound, this means \$19.00 to \$25.00 in extra money, and our price is but \$12.75.

READ HOW THIS MACHINE IS CONSTRUCTED. All heavy parts are made from special gray iron exceedingly tough and strong. SHAFTS are cold rolled steel carefully case hardened by the cyanide process, insuring long wear and perfect bearings. GEARS are not cast as many others are but are all cut from solid bar steel, each tooth milled separately and accurately. COMBS AND CUTTERS are the finest Swedish razor steel carefully tempered and ground by our secret process, insuring not only a perfect cutting edge, but enabling them to outwear any other comb ever manufactured. It cuts on the same principle as the Martin Wizard and embodies many of the fine features of that wonderful machine. In fact, the Martin Standard is second only in mechanical perfection to the wonderful Martin Wizard. Any other machine on the market is a third rate machine as compared with these two machines. It is so simple and easy to run that a twelve-year old boy can turn it. You cannot injure or cut yourself or the sheep. You take no chances whatever with the Martin Standard. While running at full speed the wear of the comb and cutter can be taken up. There is no cumbersome mechanism or adjusting above the comb and cutter; neither sand nor dirt can enter the working parts.

SEND TODAY FOR THE MARTIN STANDARD ON OUR GUARANTEE PLAN. We guarantee to satisfy you or refund your money, both price and any transportation charges you paid. Stop losing money, stop wasting money, stop wearing yourself out by using the slow hand shears, and save labor and money by letting this machine do your work.

WHY WE SELL THESE MACHINES AT SUCH A LOW PRICE.

If you could buy a machine equal to the Martin Standard at a dealer's, it would cost you at least \$25.00, because it would have added to it many selling expenses and profits which would amount to more than the original cost of manufacturing the machine. When you buy from us, you are getting these machines on the same basis as you get all the rest of our merchandise from us. We ask you to pay us just the actual manufacturing cost with but one very small margin of profit added. Whatever you pay, over and above our price, for other machines, is an absolute loss to you; and furthermore, it does not bring you as good a machine. Our selling methods enable you to get the best machines at away less than what the imperfect machines on the market would cost you. Remember, we guarantee to satisfy you or refund your money.

OK4857 The Martin Standard Sheep Shearing Machine, complete, ready to operate and ready to attach to post or wall. Weight, packed for shipment, \$12.75

OK4858 Martin Standard Sheep Shearing Head with extra Comb and Cutter. Price, \$7.00

EXTRA COMBS AND CUTTERS.

THE Martin Wizard Ball Bearing Horse Clipper

REDUCED FROM \$16.95 TO \$14.95

FARMERS AND LIVERY STABLE OWNERS, ALL OWNERS OF HORSES, HERE IS A GREAT MONEY SAVER, A GREAT LABOR SAVER FOR YOU. BLACKSMITHS AND OTHERS WHO MAKE A BUSINESS OF CLIPPING HORSES, HERE IS A BIG MONEY MAKER FOR YOU

THE MARTIN WIZARD MARKS A NEW ERA IN HORSE CLIPPERS.

It has made a revolution in the field of horse clipping. Like our Martin Wizard Sheep Shearing Machine, it is radically different from all other machines and is in a class by itself. It is years in advance of any other make on the market. It clips closer, runs easier, faster, smoother and at less than half the expense of any other machine.

IT PAYS FOR ITSELF IN THE COST OF CUTTERS ALONE. Few other machines cost less than \$1.00 each; many cost more. Their construction is expensive; but cutters for the Wizard cost only \$2.25 per dozen, \$1.25 per half dozen, 25 cents each; or from one-sixth to one-fourth as much as others. In this item alone you make enough to save the cost of this machine.

LEADING AUTHORITIES ON LIVE STOCK agree that clipping is decidedly now so thoroughly established that it is hardly necessary to mention it, but as some horse owners may not have given the subject any particular attention, we will mention a few points for your information:

MANY DISEASES TO WHICH HORSES ARE SUBJECT are due to their perspiring freely for hours at a time in their wet, soggy coats of hair. They catch cold and this rapidly leads to pneumonia, rheumatism, distemper, or some other of the scores of complications. Clipping insures against such conditions. It is humane to thus make your horse free from such conditions and make him comfortable, as well as a good business proposition from your standpoint. You will get more work out of him and prevent the expense of veterinary surgeons' bills. Remember the old saying, "An ounce of prevention is worth a pound of cure."

THE CLIPPED HORSE IS A WELL HORSE that does his work well, is always up and coming; he is free from perspiration, which always makes him uncomfortable and eventually chills him. He digests his food better and gets the benefit of all he eats. He will not waste his food. A clipped horse dries out rapidly after a hard day's work; he rests more comfortably at night and comes to his work refreshed the following day. As an experienced owner of horses, you know, and it stands to reason, that the horse with a thick coat of hair, wet and soggy with perspiration, does not get a comfortable night's rest in the stable, especially in the cool spring nights, and cannot therefore be as refreshed as a clipped horse. You can see clearly how he is liable to be seized with disease.

THERE IS PLEASURE IN RIDING BEHIND A CLIPPED HORSE, as he does not shed his hair, you have never the experience of getting horse hair in your mouth, or having your clothing covered with dead hair, from which nature is trying to relieve the animal. The clipped horse is in the pink of condition, bright, fresh and spunky and travels beautifully. Assist nature, clip your horse and keep him comfortable; enjoy your drive; protect him against disease, and you will never have any trouble with him.

Extra Comb and Cutter for Martin Wizard Horse Clipping Machine:

No. 57 Top Cutter. Price, each.....	.25
No. 68 Martin Wizard Head. Price.....	7.50

\$10.75 THE MARTIN STANDARD BALL BEARING HORSE CLIPPER

SECOND ONLY TO THE MARTIN WIZARD THE MARTIN STANDARD BALL BEARING HORSE CLIPPER IS THE STRONGEST, FASTEST CUTTING, EASIEST RUNNING AND THE MOST PERFECT WORKING HORSE CLIPPING MACHINE YOU CAN BUY.

WHILE WE SPECIALLY RECOMMEND THE MARTIN WIZARD Ball Bearing Horse Clipper, above illustrated and described, because it does the finest work ever done by any of the work of other machines, yet, if for your purpose, you do not desire such a highly developed, finely adjusted machine as the Martin Wizard, you certainly cannot overlook Our Martin Standard, which is second only to the Martin Wizard. Any other machine in the world must take third place as compared with these machines.

IT IS A MARVEL OF SIMPLICITY AND STRENGTH. The cutting head consists of eight parts, including the comb and cutter. Of these only three are movable, thus reducing friction to the minimum. The main driving shaft is of the finest cold rolled steel, cut from solid bar and specially hardened by the cyanide process, making it practically indestructible. The oscillating sleeve is of phosphor bronze, used the world over only in expensive and high class machinery because of its great strength and wearing qualities. The main shaft is mounted on ball bearings of our own design; an exclusive feature of Martin Clippers fully protected by patents. The combs and cutters are made from the finest Swedish razor steel and carefully tempered by our own process and guaranteed absolutely true to 1-5000 of an inch. Another exclusive feature, fully covered by patents, is the position of the teeth on the upper plate. They are arranged so that some of them are cutting all the time, while other clippers cut by jerks. Move the top plates of any other clipper across the comb slowly, you will see at one point all of the teeth closed and hair cannot enter; turn a little further and you will find all the teeth open and thus all the spaces will be filled with hair at once. At the next move the knives must cut the whole row at one cut, and then the entire cutting surface is closed again. This is the reason why other machines run with a short, jerky motion. They work just half the time and are closed the other half, but The Martin Standard clips all the time. Some of the teeth are always cutting, thus distributing the work evenly and thus insuring a steady motion, requiring just one-half the power to operate the knives, thus making the Standard the easiest running machine in the world, second only to the Martin Wizard.

THE MARTIN STANDARD WILL LAST A LIFETIME with only ordinary care, because of the extra fine material in it and the extraordinary care with which it is made. The head being covered with heavy nickel plated copper and the frame finished with our specially air dried enamel. It is noiseless in operation, as there are no gears to rust and break. The machine runs so easily that a light belt transmits all the power necessary and the belt never slips.

DON'T FORGET THAT CLIPPING YOUR HORSE INSURES HIM against diseases; don't wait until the horse gets out of condition before using this method to better his health conditions. If you have not made a practice of clipping your horses, don't let \$10.75 stand in your way.

REMEMBER, WE ASK ONLY A FAIR TEST for this machine. Send us your order, ask for No. 10K4879, enclose our price, \$10.75, and we will send you the machine, thoroughly well boxed, guaranteeing it to arrive in perfect condition. When you receive it, give it a thorough test, and if you don't find it the best horse clipping machine you ever tried, you are at perfect liberty to return it to us at our expense, and we will refund to you both the price and any transportation charges you paid on it.

No. 10K4879 The Martin Standard Horse Clipper, complete with stand (as illustrated). Price.....

\$10.75

Weight, packed for shipment, about 90 pounds.

Extra Combs and Cutters for Martin Standard Horse Clipping Machine.

No. 207 Cutter or Upper Plate. Price, each.....	.25

pipe, which never breaks or wears out. The large balance wheel is mounted on Bessemer steel rolls of our special design, without question the easiest running, longest wearing bearing in the world. The small transmission pinions are made of the finest cold rolled steel, cut from a solid bar and hardened by the cyanide process. This machine has ball bearings of our own patented design and is exceptionally easy running and noiseless. The shaft is made of the best Bessemer steel wire and covered with our specially woven braided fabric. The head of the Wizard is in itself a real marvel. Instead of having innumerable teeth, there are but two suspended from a common axis, thus always equalizing the pressure. Both comb and cutter are made of the finest Swedish razor steel, carefully tempered and ground. They are constructed to do twice the work of ordinary clippers, and the machine will pay for itself many times over in the saving of extra work. The top cutters cost but 25 cents each, while others cost from four to six times that price and are inferior to our Martin Wizard cutter. Consider the make and quality of this machine; compare it with what you know of other machines, consider our low price—only \$14.95, and let us send you this machine on our free trial plan.

ARE YOU A LIVERY STABLE OWNER or a farmer, or do you own a number of horses? Remember, the regular price for clipping horses is \$2.50 each and you save that much on each horse by buying this clipper. You can see how very quickly this machine will pay for itself. Even if you are the owner of but one horse, it will save you money because it saves you the cost of the job. Clipping makes a cleaner and more perfect job than any other machine; keeps your horse well and free from all disorders.

ARE YOU A BLACKSMITH or do you clip horses for profit? With the Wizard Machine you can clip faster and easier than with any other machine known. You can clip for \$1.50 to \$2.00 per horse; thus cutting the regular price and earn more than you can with any other machine per day at that. This will give you all the business in your locality and make the Wizard a big paying proposition for you. With a boy helper you can clip from six to eight horses a day easily and make from \$10.00 to \$20.00 per day.

OUR PRICE represents just the actual manufacturing cost and a small margin of profit. Don't imagine because the price is only \$14.95 that it cannot be as good as the machines offered for fancy prices elsewhere. Remember, we guarantee it to be the best machine on the market regardless of name, make or price of other machines. If sold on the usual basis where agents' or dealers' profits and expenses would be added, it would cost you more than double this price.

OUR GUARANTEE Ask for No. 10K4874 Martin Wizard Horse Clipper, enclose our price, \$14.95, and we will ship the machine strongly and carefully boxed, guaranteeing safe delivery. When received, take it out to your stable, put into operation, and if you do not find it the easiest running, fastest and smoothest cutting and the simplest machine that you know of; if it does not do the most beautiful work you ever saw, or if it in any way does not measure up to your expectations; if it is not all that we claim for it, we want you to return it to us at our expense and we will refund to you both the price and any transportation charges you paid on it.

HOMESTEAD ENTRY.

U. S. LAND OFFICE,

Phoenix Arizona

SERIAL NO. 045603

APPLICATION.

RECEIPT NO. 785637

I, Orval A. Robertson Male, a resident of
Peoria Maricopa Co. Ariz.
(Give full Christian name. (Male or female?))
(Town, County, and State.)
do hereby apply
to enter, under Section 2289, Revised Statutes of the United States, the

SW 1/4 NW 1/4, N 1/2 SW 1/4, SE SW 1/4 Section 15
Township 4N, Range 1W, Y & B Meridian, containing 160
160 acres, within the Phoenix Ariz land district;

and I do solemnly swear that I am not the proprietor of more than 160

acres of land in any State or Territory; that I am a

native born citizen of the United States, and
(Applicant must state whether native born, naturalized, or has filed declaration of intention to become a citizen. If not native born, certified copy of naturalization or
declaration of intention, as case may be, must be filed with this application.)

am married and over 21 years of age
(State whether the head of a family, married or unmarried, or over twenty-one years of age, and if not over twenty-one, applicant must set forth the facts which
constitute him the head of a family.)

that my post-office address is Peoria, Ariz;
that this application is honestly and in good faith made for the purpose
of actual settlement and cultivation, and not for the benefit of any
other person, persons, or corporation; that I will faithfully and hon-
estly endeavor to comply with all the requirements of law as to settle-
ment, residence, and cultivation necessary to acquire title to the land
applied for; that I am not acting as agent of any person, corporation, or
syndicate in making this entry, nor in collusion with any person, cor-
poration, or syndicate to give them the benefit of the land entered, or
any part thereof, or the timber thereon; that I do not apply to enter the
same for the purpose of speculation, but in good faith to obtain a home
for myself, and that I have not directly or indirectly made, and will not
make, any agreement or contract, in any way or manner, with any person
or persons, corporation or syndicate whatsoever, by which the title
which I may acquire from the Government of the United States will inure
in whole or in part to the benefit of any person except myself. I
further swear that since August 30, 1890, I have not entered and ac-
quired title to, nor am I now claiming, under an entry made under any
of the nonmineral public-land laws, an amount of land which, together
with the land now applied for, will exceed in the aggregate 320 acres;
and that I have not heretofore made any entry under the homestead laws

(except None)

(Here describe former homestead entry by section, township, range, land district, and number of entry; how perfected, or if not perfected state that fact.)

that I am well acquainted with the character of the land herein applied
for and with each and every legal subdivision thereof, having person-
ally examined same; that there is not to my knowledge within the limits
thereof any vein or lode or quartz or other rock in place bearing gold,
silver, cinnabar, lead, tin, or copper, nor any deposit of coal, placer,
cement, gravel, salt spring, or deposit of salt, nor other valuable
mineral deposit; that no portion of said land is claimed for mining
purposes under the local customs or rules of miners, or otherwise; that
no portion of said land is worked for mineral during any part of the
year by any person or persons; that said land is essentially nonmineral
land, and that my application therefor is not made for the purpose of
fraudulently obtaining title to mineral land; that the land is not
occupied and improved by any Indian.

Examined and passed: C. S. Div. 0

Orval A. Robertson
(Sign here, with full Christian name.)

NOTE.—Every person swearing falsely to the above affidavit will be punished as provided by law for such offense. (See Sec. 125, U. S. Criminal Code, over.)

QUESTION 10. If there have been any such absences, give the dates covered by such absences, stating who was absent and for what reason.

ANSWER. None.....

The United States of America,

To all to whom these presents shall come, Greeting:

WHEREAS, a Certificate of the Register of the Land Office at **Phoenix, Arizona,** has been deposited in the General Land Office, whereby it appears that, pursuant to the Act of Congress of May 20, 1862, "To Secure Homesteads to Actual Settlers on the Public Domain," and the acts supplemental thereto, the claim of **Orval A. Robertson**

has been established and duly consummated, in conformity to law, for the southwest quarter of the northwest quarter, the west half of the southwest quarter, and the southeast quarter of the southwest quarter of Section fifteen in Township four north of Range one west of the Gila and Salt River Meridian, Arizona, containing one hundred sixty acres,

according to the Official Plat of the Survey of the said Land, returned to the GENERAL LAND OFFICE by the Surveyor-General:

NOW KNOW YE, That there is, therefore, granted by the UNITED STATES unto the said claimant the tract of Land above described; TO HAVE AND TO HOLD the said tract of Land, with the appurtenances thereof, unto the said claimant and to the heirs and assigns of the said claimant forever; subject to any vested and accrued water rights for mining, agricultural, manufacturing, or other purposes, and rights to ditches and reservoirs used in connection with such water rights, as may be recognized and acknowledged by the local customs, laws, and decisions of courts; and there is reserved from the lands hereby granted, a right of way thereon for ditches or canals constructed by the authority of the United States.

IN TESTIMONY WHEREOF, I, **Woodrow Wilson**

President of the United States of America, have caused these letters to be made Patent, and the seal of the General Land Office to be hereunto affixed.

GIVEN under my hand, at the City of Washington, the **THIRD**

(SEAL)

day of **JULY** In the year of our Lord one thousand nine hundred and **SEVENTEEN** and of the Independence of the United States the one hundred and **FORTY-FIRST.**

By the President:

By

Woodrow Wilson
E. D. Buddin, Assistant Secretary.
G. W. Samar,
 Recorder of the General Land Office.

Sec. 2291 R.S.

FEB 6 - 1917, 19
(Date.)

It is hereby certified that, pursuant to the provisions of Section 2291, Revised Statutes of the United States,

ORVAL A. ROBERTSON,

of Peoria, Arizona,

has made payment in full for SW $\frac{1}{4}$ NW $\frac{1}{4}$, W $\frac{1}{2}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$ SW $\frac{1}{4}$

Section 15,

Township 4 N., Range 1 W., G. & S. R. Meridian,
 Arizona, containing 160 acres.

Now, therefore, be it known that, on presentation of this Certificate to the COMMISSIONER OF THE GENERAL LAND OFFICE, the said Orval A. Robertson

shall be entitled to receive a Patent for the land above described if all then be found regular.

J. L. Linn, Register.

NOTE.—A duplicate of this Certificate is issued to the claimant as notice of the acceptance of the proof and payment, and of the allowance of the entry by the Register and Receiver.

The original is forwarded to the General Land Office, with the entry papers, for approval by the Commissioner of the General Land Office and issuance of patent.

The duplicate copy forwarded to the claimant should be held until notice of issuance of patent is received.

In all correspondence concerning the entry in connection with which this Certificate issued, refer to the NAME OF THE LAND OFFICE and the SERIAL NUMBER noted hereon.
